SAMPLE DESCRIPTION

SUBJECT: General identification of contents

Sample 1. 1 qt. liquid

Sample 2. 16 oz. liquid

RESULTS:

Sample 1. Preliminary analysis indicates the sample to be a mixture of hydrocarbon liquids generally classed as solvent(s), and/or light oil(s).

Sample 2. Basically similar to Sample 1, only containing a considerable portion of sludge. The exact composition of this sludge (organic/inorganic) has not as yet been determined.
